

How Does The Evaluation Process Work?

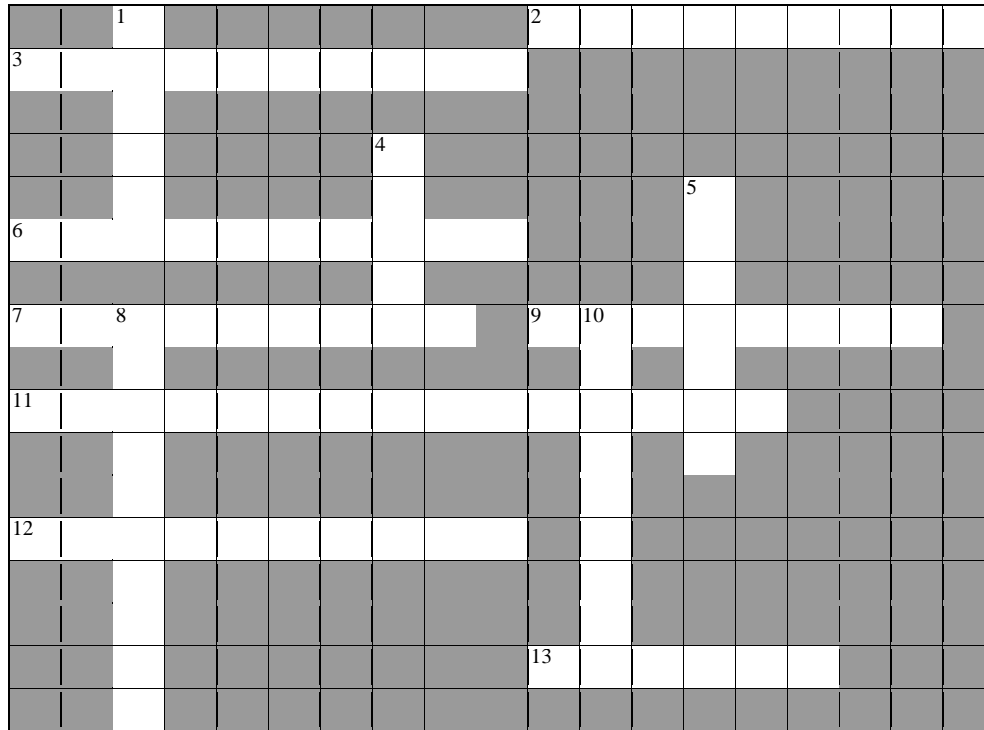

The evaluation process is very thorough. Your health care team will need to know a lot of things to help them and you decide whether a transplant is right for you. You'll meet with medical professionals who'll put you through an extensive series of tests and X-rays that tell about your overall health. Everything that can affect how well you can handle treatment will be reviewed. If someone close to you would like to donate a kidney to you, that person will also need to go through an evaluation process to determine whether he or she is suitable to donate to you.

ARE YOU FEELING ANXIOUS?

If you answered "YES" to any of the questions above, you may be suffering from an anxiety disorder. Anxiety disorders are one of the most common emotional disorders in both children and adults. The good news is that anxiety disorders can be treated, and we can help! Call one of our facilities today to set an appointment.
